Global Concept is happy to present to you its catalogue 'Lighting&Decoration 2012'.

As is the case every year, our collections have been enriched with new products so that magic and enchantment will be the key words for your projects.

To make it easier to use, we have subdivided the catalogue into ten specific chapters. We hope you will enjoy reading it, and we are at your service to advise and guide you in developing your projects.

SIMPLY CONNECT

Stimulate your creativity and make your life easier with our complete range of Simply-Connect products.

Connect all our Simply-Connect products to each other and compose the setting you want indoors or outdoors from a single outlet !

Speed and ease of installation, quality and safety are the key words of this range.

LED

In the current context, saving energy constitutes an essential factor in carrying out decorating and illumination plans.

Besides their low consumption of electricity, the LEDs that we use are meticulously selected in order to guarantee the uniformity of the colours.

Our garlands are made up exclusively of LEDs with a wide angle of emission in order to foster the balanced diffusion of the light.

SHOWROOM

We have a large showroom at your disposal in Nivelles.

The showroom extends over more than 600 m² and the majority of our products are exhibited there. We are easily accessible from Brussels airport (Zaventem) or the airport in Charleroi (Brussels south), or from the high-speed train-Eurostar railway station in Brussel.

Please contact our sales department for an appointment.

A PARTNER FOR YOUR PROJECTS

Looking for a real and trusted partner during your projects ?

We support you throughout all your projects with professional advice and exclusive products based on a real trusted partnership and our broad experience.

Last but not least, our studio works with the latest technologies to give you the opportunity to see your project in advance thanks to professional artwork.
